Name of Website: GamerGauntlet.com, The tag line will be "The store with all a gamer's needs!"

Description: Gamer Gauntlet is a website dedicated to showcasing and selling different video games and gaming accessories. This site will allow users to browse games by platform, genre, and popularity. Users will be able to create accounts to save games to a wishlist or shopping cart for future purchase. The website will be able to highlight new releases, games that have upcoming releases, and featured deals. Overall, the goal of the site is to provide an engaging and easy to use online game store experience for gamers that want all their needs in one place.

Description of Data: The website will be able to store data related to video games, gaming accessories and users. Game data will include the game title, description, price, platform, genre, release date, and stock availability. Gaming accessory data will include the accessory name, description, price, brand, compatibility (such as PC, PlayStation, Xbox, or Nintendo), and inventory quantity. User data will include username, email, encrypted password, wishlist items, and shopping cart contents. An administrator will be able to add, edit, and delete games from the store inventory. Users will be able to view games, add or remove items from their wishlist or cart, and be able to view their saved data.
